

RP POLICY

RADIATION PROTECTION

OUR COMMITMENT

Our aim is to deal with radiation protection with the same rigour as we apply to Health & Safety, i.e. by continuously improving our results and controlling the risk of contamination.

In doing so, we undertake to:

- Comply with regulations and compliance obligations relating to the protection of workers against ionising radiation.
- Train our personnel in the radiation protection regulations for operators and the wearing of protective equipment.
- Reduce the personal and collective dose to a level that is as low as possible.
- Act impeccably in terms of entering/leaving restricted areas.
- Comply with clients' requirements in line with the above commitments.

Please see below, the target personal and collective doses associated with external exposure for 2019.

Personal dosimetry	Collective dosimetry
Category B	Category B
0.5 mSv	2 H.mSv

In terms of internal exposure, for the year 2019, the target is set at 0 internal contamination of personnel.

These target personal and collective doses apply to CTP environnement personnel reporting any anomalies in terms of radiation protection.

Philippe BARRE
Chief Executive Officer

The QHSE Department benefits from my unqualified support for its efforts to maintain rigorous application of the Radiation Protection Management System. Julien HOUBION has been appointed Radiation Protection Manager and he is assisted in this role by Mrs. Anne-Marie PATELLIS, who will be our Qualified Expert in Radiation Protection for this period.

Conflans Sainte-Honorine, 22nd January 2019
